

PACKERS TECH OIL

To be used as a lubricant or anti-rust film on equipment and machine parts in locations in which there is exposure of the lubricated part to edible products. This may also be used as a release agent on gaskets or seals of tank closures.

Directions: Use the minimum amount required to accomplish the desired technical effect on the equipment. As an anti-rust film the compound must be removed from the equipment surface by washing or wiping as required to leave the surface effectively free of any substance which could be transferred to food being processed.
