

SNOW THERM M

Ice melting compounds have been used for years in areas where ice and snow would be hazardous to the general public. This product is a premium ice melting chemical compound. **SNOW THERM M** melts ice quickly on walkways, driveways and steps. Slick, dangerous surfaces can be made safe in minutes.

Directions: Simply spread $\frac{1}{2}$ to 1 lb. of this product per square yard depending on thickness of ice and prevailing temperatures. After just a few minutes the resulting slush can be easily removed. If spread on areas at beginning of storm, this will prevent ice and snow from sticking. Play it safe, use generously on all dangerous areas. Note: All de-icers may be harmful to concrete surfaces.
